

Remarks:

The examiner indicated that replacement drawings in compliance with 37 CFR 1.84 and 1.21 were required. Enclosed herein are thirty-one sheets of replacement drawings, the replacement drawings being substantially identical in substantive content to the previously presented drawings. Figures 28 and 29 were previously submitted on a single sheet, and are now presented with each drawing on its own sheet in order to enhance the legibility of the figures.

The examiner objected to the application because it contains a data file on a compact disc which is not identified in the paper portion of the specification with a listing of all of the files contained on the disc. Applicant has amended the specification to identify each disc and the files contained on the discs including the file name, file size, and file creation date.

The examiner is invited to contact Applicant's undersigned counsel at (734) 662-0270 should he have any questions respecting this paper, or if a telephone interview might otherwise advance the prosecution of this case.

Respectfully submitted,

Christopher A. Mitchell
